

Self-Lubricating Sleeve Bearing/Spacer - Flange

A self-lubricating sintered bearing is a metallic component with high porosity (20-25% in volume), impregnated in a lubricant oil. The oil contained in the porosity provides a constant lubrication between bearing and shaft, so the system does not need any additional external lubricant.

SKU: [MCH1648](#)

Brief Data:

- Material: Bronze.
- Inner Diameter: Ø8mm.
- Outer Diameter: Ø12mm.
- Height: 15mm.
- Bearing Type: Single Flange.
- Self Lubricating.
- Recommended Shaft Diameter: Ø8mm.

Mechanical Dimension:

Unit: mm

The Face behind our product quality...

In a world of constant change and continuous technological development, a new or replacement product is never far away – and they all need to be tested.

Many vendors simply import and sell without checks and this cannot be the ultimate interests of anyone, particularly the customer. Every part sell on Handsotec is fully tested. So when buying from Handsotec products range, you can be confident you're getting outstanding quality and value.

We keep adding the new parts so that you can get rolling on your next project.
